PHP and Databases

Planning Document

This webpage will be a forum for the game “Crimson Desert”, it will allow players to seek information about the game, such as weapons, characters, regions, side quests, story quests etc. Each category will have brief information on every weapon and how the player can acquire it. Furthermore, every person with a registered account will be able to comment below.

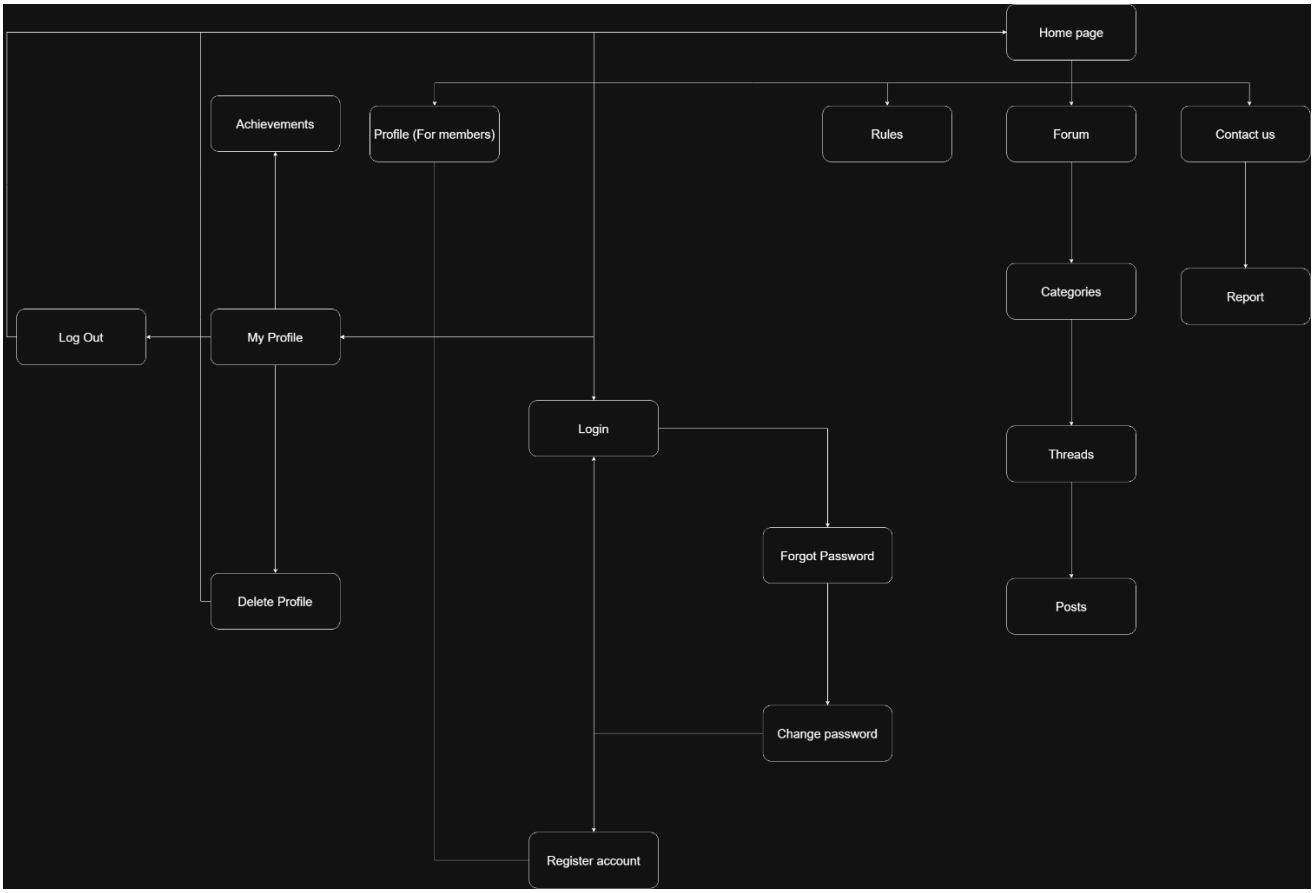

The forum will have a login system where users will need to provide their username, age, email and country. This will allow them to interact and engage with posts. They will also be able to get achievements in their profile depending on how active they are

Players will be able to open threads themselves, where it can lead to discussions about whichever topic they like. They will need to add tags and select a category for the thread, so the forum is kept organized and efficient.

Players can report users who do not follow the rules and regulations of the forums, they will need to submit a report through our page, they will need to select a reason for report and a description of what happened.
